ARTICLE: 6.0 BUSINESS SUPPORT SERVICES

6.90 TECHNOLOGY

SECTION 6.90 TECHNOLOGY STANDARDS

The District is committed to providing optimum support for technology to the entire District learning community to maximize learning. In order to achieve this, it is necessary to standardize our technology resources, including, but not limited to, computers, servers, laptops, personal data assistants (PDAs), flash disks, software, and webtools.

All new technology purchases, leases, and donations will be governed by the District standard requirements as stated in administrative procedure. Any newly-purchased technology resources that comply with the District standard requirements as stated in the administrative procedures will be supported by the District. Purchases not complying with standard requirements will require prior written consent from the Technology Support Services/Information Support Services departments.

Administrative Procedures will be reviewed annually and revised to address changes in technology and/or educational needs.
