

**POWAY UNIFIED SCHOOL DISTRICT
4TH GRADE PROBLEM SOLVING ASSESSMENT**

Wheels

Hank is collecting wheels. He already has 29. He wants to collect enough wheels so that he can make the same number of each kind of vehicle: two-wheeled bicycles, three-wheeled tricycles, and four-wheeled racing carts.

He doesn't want to have any wheels left over. What is the least number of wheels he still needs to collect?

Show your answer using charts, tables, or equations, and WORDS. Use additional paper if you need to show your work.

Hank needs to collect _____ more wheels.
