

The Video Editing Window

The screenshot displays the Pinnacle Studio 8 video editing interface. On the left side, a vertical toolbar contains several icons, each highlighted by a red box with a white text label and a red arrow pointing to the icon. The labels are: 'Change Video Clip Properties' (pointing to the wrench icon), 'Add a title or graphic' (pointing to the 'T' icon), 'Create or edit a disc menu' (pointing to the disc icon), 'Grab/save a still from a frame of video' (pointing to the camera icon), 'Vary playback speed of a clip' (pointing to the speed icon), and 'The Video Toolbox' (pointing to the toolbox icon). The main editing area is divided into several sections: a top menu bar with 'File Edit View Album Toolbox Setup Help', a project name 'Pinnacle Studio - Untitled *', and a progress bar showing '1 Capture 2 Edit 3 Make Movie'. Below this is a preview window with a 'Name: Video 5 [00]' and 'Duration: 0:00:35.02'. The preview window shows a video of a panda sitting on a tree branch. Below the preview window is a timeline with a yellow background and a scale from 00:00 to 0:01:00.00. The timeline shows a video clip of the panda starting at 00:00 and ending at 00:02:00. Below the timeline is a 'Cricket' track. The bottom of the screen shows the Windows taskbar with the 'Start' button and the application name 'Pinnacle Studio - Unti...'. The system tray shows the time '11:58 AM'.

Change Video Clip Properties

Add a title or graphic

Create or edit a disc menu

Grab/save a still from a frame of video

Vary playback speed of a clip
