

unitedstreaming and Inspiration 8

Embedding *unitedstreaming* video segments in Inspiration 8

Inspiration 8 allows users to embed a video clip within your Inspiration web using downloaded *unitedstreaming* QuickTime* files.

To insert a video segment:

1. Click on the main window where you want to insert a video segment
2. On the menu bar, under Tools, slide down to Insert Video or Sound, then select Video.
3. Navigate your computer to the video segment you want to insert, then click Open.

The video will be embedded into the diagram, you will see the first frame of the video as the video image.

Look for the video segment icon  to indicate that a image symbol has a video attached.

To play the video, double click on the image, the QuickTime player window will open up to display the movie.

Notes:

- You can drag and drop a video from a video editing program or drag and drop the video file. Arrange the program windows so that both the video and the Inspiration window are visible. Drag the video to the diagram.
- To copy and paste a video onto a diagram, in the video editing program, copy the video. In the diagram, click where you want the video symbol to appear. On the Edit menu, choose Paste.
- When you import a file that QuickTime does not recognize, Inspiration creates a hyperlink to the file.
