

VISITORS/OUTSIDERS

Visitations serve valuable educational purposes by acquainting parents/guardians with the curricula and the process of teaching and learning, thereby gaining the greater understanding and involvement of our primary stockholders. Furthermore, it is recognized that opportunities to showcase school programs and learning are invaluable in promoting the achievements of students, status of teachers, and the profession.

The concept of a strong school-home partnership requires that parents/guardians feel welcome at school and school activities but yet not detract from student learning and the educational process. In order to maintain a balance among our three core values, "All Students Learning," "Parents as Partners," and "Safe, Attractive, and Orderly Environment," the visitation procedure will accommodate adult visitors while incorporating campus safety and security measures.

The Superintendent or designee shall develop a visitation procedure which will accommodate adult visitors and protect student learning while incorporating campus safety and security measures.
