World!**

About Me

Annie Chan

Transplant from NYC in 2006

Worked 10 years in Finance

Always admired the

SoCal lifestyle -

I want to be a surfer!

15th year at Oak Valley

About Our Class

Preparing children for the future

There's no denying that we're moving toward a technology-driven society. Knowing how to use technology — everything from digital menus to self-driving cars — prepares students for the future. Technology skills learned early can support the growth of students both in their careers and personal lives.

Topics

- **Career preparedness.** Internet skills are essential for success in higher education.
- **Life skills.** Searching for jobs, writing cover letters, and sending emails are all crucial skills for 21st century success.
- **Digital citizenship.** Learning to present yourself on the internet is an increasingly important skill.
- **Supporting collaboration and connection.** How to use technology for students to connect with people in the classroom and around the globe.
- **Block-based coding.** Learning to organize & structure instructions in programs without worrying about syntax.
