

SUMMER CAMPS FOR GRADES 1-8

Grades 1-2, Week 1: June 17-21

Super Foods, Power Moves and Cool Vibes

Correia/Parkes

#8052

\$169.

Power Up this Summer! Create and taste delicious food combinations. Explore outside, connect with nature, and learn how to grow your own food! Unwind with music, sound, and movement. Have fun with allergy-free whole food plant-based nutrition, play and games, and relaxation. This interactive camp provides a creative way to engage students in healthy habits while learning how to balance their mind and body.

Amazing Animals in Art

Hayes

#8053

\$169.

Come explore the amazing world of animals in art. Our young artists will draw, paint, cut and paste as they develop skills and learn new techniques while working in many mediums, they will create splashing orcas; pen and line furry bears; a big, bright and colorful dog or cat collage; a pop-art animal abstract and more.

The Science of Colors

Janette

#8054

\$169.

Students learn science and art concepts through color exploration. Topics include color mixing, complementary colors, chromatography, shades and tints, and rainbows through art, science experiments, and games.

Dr. Seuss on the Loose with STEAM

Palmer

#8055

\$169.

Throughout this camp, students will listen to beloved Dr. Seuss books. Then, work in teams to research and construct various STEAM projects using STEAM bins with vastly different materials. Students will learn about gravity, weight, measurement, basic construction of structures as well as the science behind animal behaviors, habitats, and needs.

Fantastic Photo Fun

Royal

#8056

\$169. Each

day campers will look through their lens differently covering topics such as Plants and Nature, Group Portraits and Bugs Life! Each camper will build a photo album to take home as a camp memory.

Grades 1-2, Week 2: June 24-28

Hands-on Arts & Crafts

Bavardeh

#8057

\$169.

Come and enjoy an old-fashioned fun arts and crafts camp with a new twist on recycled materials and more. We will create theme-focused projects such as String Art, Pet Rocks, Egg Carton Art and more in a fun camp environment!

Kids on Stage

Janette

#8058

\$159.

Students learn theater skills including improvisation, memorization, character development, listening and focus, collaboration, costume making, pantomime, and more.

Dr. Seuss on the Loose with STEAM

Palmer

#8059

\$169.

Throughout this camp, students will listen to beloved Dr. Seuss books. Then, work in teams to research and construct various STEM projects using STEM bins with vastly different materials. Students will learn about gravity, weight, measurement, basic construction of structures as well as the science behind animal behaviors, habitats, and needs.

A Week of Disney

Podeszwick

#8060

\$159.

Who doesn't love Disney! During this week, students will participate in all things Disney! We will learn Disney songs, do Disney Art, play Disney games and even watch a Disney movie! Join us for Disney fun and it will feel like you have spent the week at the happiest place on earth!

Fantastic Photo Fun

Royal

#8061

\$169.

Each day campers will look through their lens differently covering topics such as Plants and Nature, Group Portraits and Bugs Life! Each camper will build a photo album to take home as a camp memory.

Grades 1-2, Week 3: July 8-12

Imaginarium **Bavardeh** **#8062** **\$169.**
Campers will have an opportunity to put their creativity to work through architectural design, finger print art and making anemometers as special inventors!

The Art & Science of Animals **Becker** **#8063** **\$169.**
Each day students will learn about a new animal and create an animal art project. We will learn about animal life cycles, adaptations, habitats, diets, food chains, endangered animals and how we can help protect them. We will explore a different art medium, element, or principle in each project.

Experiment With Science & Art **Phaneuf** **#8064** **\$169.**
Using picture books as the catalyst for the days' activities, students will create art or craft activities and a science experiment covering such themes as rockets, plants and nature prints, kirigami flowers, newspaper baskets and tie-dye shells.

Around the World in 5 Days! **Podeszwik** **#8065** **\$159.**
Join us for a tour around the world in 5 days! Each day, we'll learn about a different continent. We will read, write, play games and learn about food and customs from the day's region! Come with us, Around the World in 5 days!

Grades 1-2, Week 4: July 15-19

Party Around the World **Bavardeh** **#8066** **\$169.**
Campers will have the opportunity to learn more about the world in which we live. This program will connect children with different cultures as they discover a new country each day. We will complete hands-on activities such as map and flag making, food experiences and cultural dances to learn more about the cultural elements of each part of the world.

The Art & Science of Animals **Becker** **#8067** **\$169.**
Each day students will learn about a new animal and create an animal art project. We will learn about animal life cycles, adaptations, habitats, diets, food chains, endangered animals and how we can help protect them. We will explore a different art medium, element, or principle in each project.

Introduction to Spanish **Fanianos** **#8068** **\$159.**
Campers will learn Spanish concepts like greetings, colors, numbers, animals, family members, fruits and body parts. We will experience all things Spanish through songs, stories, finger plays, music and movement, board games and hand on activities.

Musical Theatre **Reiserer** **#8069** **\$149.**
Campers will sing, dance and act to create a unique finale' Friday performance. This camp is sure to help build creativity, confidence and good memories!

Grades 3-5, Week 1: June 17-21

Wild Learning with Google Apps	Dewey	<u>#8070</u>	\$149.
Students will learn and become more familiar with Google Docs and Google Slides through an animal research project. They will learn how to research, cite sources, practice typing information gathered into a Google Doc, format the document to fit their needs, create a slideshow in Google Slides by learning how to add slides, transitions, backgrounds, pictures, change text color and size, and practice oral presentation skills.			
Lego Robotics	Faulkner	<u>#8071</u>	\$169.
Students will learn the basics of Lego robotics by participating in fun lessons and challenges. They will learn how to build and program robots while developing problem-solving skills as they progress through the camp.			
Finding Your Inner Entrepreneur	Johnson	<u>#8072</u>	\$159.
In this camp, students will create and develop their own ideas find their inner entrepreneur as they find solutions / products to real problems. We will create blog posts, brochures or power points and present solutions and product ideas at the end of the week. Parents are welcome to hear the young entrepreneurs make their pitches on Friday!			
Acrylic Painting Party	Luo	<u>#8073</u>	\$169.
Artistic confidence will grow with every stroke in this camp! Students will learn basic painting techniques and brushwork skills as they complete their painting projects. Students will learn through easy to follow steps with opportunities for them to add their personal touches to their paintings using collage, stencils, and other media.			
STEM Water Camp	Mahlow	<u>#8074</u>	\$169.
Students will learn about the scientific properties of water doing fun (and wet!) experiments - building a water carrier, a boat and an ecosystem and cleaning up an oil spill! We'll take breaks with water balloon toss and sponge relays too!			

Grades 3-5, Week 2: June 24-28

STEAM Building Challenges	Elderson	<u>#8075</u>	\$169.
Students will take part in several "STEAM challenges" daily using their engineering skills as well as critical thinking skills. Students will create a mini roller coaster, build a suspension bridge, build a conveyor belt, build a safety device for an egg drop, plus lots more. This class will be very hands on and very engaging for any student.			
Wild Learning with Google Apps	Dewey	<u>#8076</u>	\$149.
Students will learn and become more familiar with Google Docs and Google Slides through an animal project. They will research, cite sources, practice typing into a Google Doc, format the document to fit their needs, create a slideshow in Google Slides and practice oral presentation skills.			
Lego Robotics	Faulkner	<u>#8077</u>	\$169.
Students will learn the basics of Lego robotics by participating in fun lessons and challenges. They will learn how to build and program robots while developing problem-solving skills as they progress through the camp.			
Creativity & Mindfulness in Art	Hayes	<u>#8078</u>	\$169.
Young artists will experience many mediums as they create art that will build confidence, emotional intelligence and mindfulness. Camp includes projects such as a beautiful mixed media Grateful Heart and a Positive Affirmation Collage; Kirigami Blooming Waterlilies; a miniature Zen garden; a collaborative colorful mandala and more!			
Musical Theatre	Reiserer	<u>#8079</u>	\$149.
Campers will sing, dance and act to create a unique finale' Friday performance! This camp is sure to help build creativity, confidence and good memories!			

Grades 3-5, Week 3: July 8-12**Poetry, Art, and Technology Extravaganza!****Elderson****#8080****\$159.**

In this exciting class, students will learn about multiple styles of poetry and unlock their inner poet. Students' will use their unique poems connected to different art projects and publish them using an assortment of tech tools. This camp is sure to be a hit for any student interested in art, poetry, or technology!

Robotics & Automation**Decker****#8081****\$169.**

Students will research robots. Then, put their hands to work building and modifying a robot. They will use their robots to simulate removing hazardous waste from a site as they learn more about robotic operation.

Japanese Letters, Arts and Origami**Kitada-Nguyen****#8082****\$169.**

Students will learn Japanese culture by experiencing Japanese style school life. One part study, the other part play. They will experiment how to write simple Japanese letters (hiragana, katakana, or kanji). Then they will master the art of origami from simple airplane to ninja blade. They will experience Shuji, Japanese calligraphy, to draw with Sumi black ink. To add more fun, they will learn how to write their own names in Japanese!

Introduction to Spanish**Fanianos****#8084****\$159.**

Campers will learn Spanish concepts like greetings, colors, numbers, animals, family members, fruits and body parts. We will experience all things Spanish through songs, stories, finger plays, music and movement, board games and hand on activities.

Boards and More: Game Design**Reiserer****#8085****\$149.**

Come and play games as we learn the secrets behind good game design! We will research current games by playing and evaluating them to ideate and brainstorm new games. Then, campers will design their very own new game!

Beg. Programming with Scratch & Spheros**Fisher, B.****#8155****\$169.**

Students will learn basic computer programming concepts using Scratch and Spheros. Scratch is a fun, visual computer language that allows students to create games, interactive stories and animations in a short amount of time. Spheros are spherical robots that you will program to do multiple tasks. Using both, students will be engaged to learn basic programming while having fun!

**2019 CAMPS MEET AT BLACK MOUNTAIN MIDDLE SCHOOL & MT CARMEL HIGH SCHOOL.
REGISTERED INDIVIDUALS WILL BE NOTIFIED OF CAMP CLASS LOCATIONS PRIOR TO CAMP.**

Grades 3-5, Week 4: July 15-19**Robotics & Automation****O'Malley****#8086****\$169.**

Students will research robots. Then, put their hands to work building and modifying a robot. They will use their robots to simulate removing hazardous waste from a site as they learn more about robotic operation.

Japanese Letters, Arts and Origami**Kitada-Nguyen****#8087****\$169**

Campers will learn Japanese culture by experiencing Japanese style school life. One part study, the other part play. They will experiment how to write simple Japanese letters (hiragana, katakana, or kanji). Then they will master the art of origami from simple airplane to ninja blade. Campers will experience Shuji, Japanese calligraphy, to draw with Sumi black ink. To add more fun, they will learn how to write their own names in Japanese.

Mixed Media Arts and The Masters**O'Connor****#8088****\$169.**

Students will experience the visual arts using the works of the masters as their guide. Students will experience us of a wide range of art supplies and techniques as they explore color theory, line and design, perspective, Gyotaku (Japanese printmaking) and modern art. The fun, relaxing environment will bring out each child's unique creativity!

Beginning French**Jaoude****#8089****\$159.**

Students will learn the basics of the French language, cultural aspects, music and the food of France through crafts, music, practice and fun!

Finding Your Next Furry Friend**Bueno****#8090****\$159.**

Students will learn about different breeds of animals to make good pet decisions and more! We will discover the costs of purchasing various animals, investigate animal habitats, discover behaviors for different types of animals, describe healthy animal attributes and learn cultural differences about animals around the world.

Super Foods, Power Moves & Cool Vibes!**Correia/Tawoda****#8083****\$169.**

Power Up this Summer! Create and taste delicious food combinations. Explore outside, connect with nature, and learn how to grow your own food! Unwind with music, sound, and movement. Have fun with allergy-free whole food plant-based nutrition, play and games, and relaxation. This interactive camp provides a creative way to engage students in healthy habits while learning how to balance their mind and body.

Learn and have fun at camp!

Grades 6-8, Week 1: June 17-21**Write It, Right Now!****Darcey, Melissa****#8138****\$159.** In

this camp students will write their very own short story, non-fiction narrative, or collection of poems. We will explore how to structure stories and enjoy creative art exercises and charade games to help students develop characters, settings, and more. Students will have the opportunity to compete in mini writing contests and create a camp writing anthology to be self-published and submitted to the Poway public library for circulation. Students will also have the opportunity to submit their writing to local and national writing competitions.

Capture Comic Excitement**Fisher, A.****#8139****\$169.**

Come celebrate all things comic, anime, gaming, and science fiction. Students will choose a character, movie, book, game, or comic to explore in detail and prepare a Kids'-con presentation to share! Each day will focus on a particular theme related to the world of fandom and kids will test their knowledge with games and activities.

Junior Mechanic**Harwell****#8140****\$149.**

Students will participate in a full-operational auto maintenance facility for an introduction to auto care and basic repair. They will learn basic hand and power tool knowledge, shop safety, preventive maintenance procedures and repairs.

Exploring Digital Photography**Holmes****#8141****\$169.**

This camp will explore the principals of composition, exposure, and creative use of lights in digital photography and address the basics of developing digital images using Photoshop. Students will have a daily photo challenge. They will learn to edit images in Photoshop and share their results in class. Students may use any digital camera for the camp. However, we recommend having a camera with a full manual mode that can capture RAW image files.

Funglish**Nolasco****#8142****\$149.**

Students will learn the art of diagramming sentences and mnemonic devices to help them remember what they learn! We will have fun playing interactive board games, will write poetry and create artwork to help solidify the new learning and reinforce concepts.

Learn to Play the Ukulele**Quiseng****#8143****\$149.** This

class is an introduction to the ukulele. Focus is on learning to play and sing with others. You will be playing in no time using "Mr. Duke's" unique teaching method. Bring your own ukulele and learn how to play!

Stamping Techniques and Paper Crafts**Simone-Kurtz****#8144****\$169.**

Students will learn stamping techniques as they make cards, experience scrapbooking and other paper crafts. They will decorate card organizers and cards to give to family and friends and have confidence to make more at home!

Healthy Cooking & Exercise**Willkie****#8145****\$169.**

In this camp students will move, breathe, connect, focus and relax through a variety of fun yoga poses! In addition to all this yoga fun, they will learn how to make quick, healthy snacks with no more than a microwave! Your child will leave this camp empowered to live a more balanced, healthy, peaceful and confident life!

**2019 CAMPS MEET AT BLACK MOUNTAIN MIDDLE SCHOOL & MT CARMEL HIGH SCHOOL.
REGISTERED INDIVIDUALS WILL BE NOTIFIED OF CAMP CLASS LOCATIONS PRIOR TO CAMP.**

Grades 6-8, Week 2: June 24-28**You'll be in Stitches****Fowler****#8146****\$159.**

Join this camp and learn to sew! Learn how to operate a sewing machine, basic sewing terms and techniques, and shop for fabrics and supplies. You will make a tote bag, pincushion, pillowcase, and shorts or a skirt all to take home! Students will need to provide materials for all but the first project and a list will be provided upon signing up for the camp.

Anatomy Academy**Barnett****#8147****\$159.**

Students will explore a variety of body systems including the skeletal, urinary, respiratory, nervous and circulatory. Computer software to measure reflex time and a simulated urinalysis lab are two fun highlights. Building models and mini-labs will enrich foundational anatomy knowledge and provide a hands-on look at how our body is such an amazing machine!

Publish Your Writing**Darcey****#8148****\$169.**

In this second session, students will shift their focus from writing to editing and publishing. Students will collaborate to edit their stories, design a book cover, develop a name for their anthology, and learn about the publishing process. This second session offers students the opportunity to learn about the power of revising and editing and work as a team to create a high-quality published book. At the end of the week, students will compile their stories together to create their very own writing anthology, which will be self-published and submitted to the Poway public library for circulation. Students will also have a chance to submit their writing to local and national writing competitions.

Exploring Digital Photography**Holmes****#8149****\$169.**

This camp will explore the principals of composition, exposure, and creative use of lights in digital photography. Additionally, we will address the basics of developing digital images using Photoshop. Students will have a daily artistic photo challenge focusing on a particular aspect of composition. They will learn to edit images in Photoshop and share their results in class. Students may use any digital camera for the camp. However, to get the most out of images, a camera with a full manual mode that can capture RAW image files is recommended.

Plaster Animal Sculptures**Mahlow****#8150****\$169.**

Learn how to make sculptures by creating a wire and paper armature, covering it in plaster, and then painting it. You can make a real animal or make one up and it can be the whole body or just the head.

Learn to Play the Ukulele**Quiseng****#8151****\$149.**

Students will learn how to play the Ukulele and learn some beginning songs.

Mixed Media Arts and The Masters**O'Connor****#8157****\$169.**

Students will experience the visual arts using the works of the masters as their guide. Students will explore a wide range of art supplies and techniques as they are introduced as color theory, line and design, perspective, Gyotaku (Japanese printmaking) and modern art. The fun, relaxing environment will bring out each child's unique creativity.

Poway Unified School District provides YEP as a high-quality, summer enrichment program for all youth regardless of their enrollment in PUSD schools. Camps are supported entirely by student tuition fees and are supplemental in nature.

Grades 6-8, Week 3: July 8-12**Introduction to 6th Grade Band****Holmes****#8153****\$159.**

In this camp, we will pick up where your fifth grade band experience ended and give you a jump-start for middle school! We will explore the new options of instruments available for you to play, learn new skills on all of your instruments and prepare a performance for parents at the end of the week. Large instruments such as Tuba, Baritone, Tenor Sax, Bari Sax, and percussion can be provided as well as some smaller instruments. However, it is best if students have their own instrument. This camp is for students entering grade 6 in the fall.

Intro to Engineering Design**Fischer****#8154****\$169.**

Turn your ideas into reality by making anything from jewelry to key chains, decorate your own creations with your signature style. Using computer aided design to make 3D drawings, you will print your creations on a 3D printer. We will start with simple shapes and work up to more complex designs as you turn your ideas into reality and learn skills used in STEAM!

Beginning Spanish**Jaoude****#8156****\$159.**

Students will learn beginning Spanish through crafts, physical activity, music and the study of the cultural aspects and food of the region.

Make a Stuffed Animal**Mahlow****#8158****\$169.**

Draw your own stuffed creature! Learn how to make a pattern so that you can turn anything you imagine into a stuffed animal. You will also learn how to embroider and sew on buttons.

Mixed Media Art: Painting and Charcoal**Novick****#8159****\$169.**

In this camp students will choose their own subject matter to create their own works of art. We will work on techniques of acrylic painting and charcoal applying both to each student's interest. Subject matter will come from still life, photographs, famous works of art, and other interests of students.

Introduction to Photography & Lightroom**Sheffler****#8160****\$169.**

Do you have an eye for photography? In this camp, you will explore all of the aspects of photography to capture the photos of your dreams! You will learn the principles of composition, exposure, the creative use of light in digital photography, and the basics of editing images using Adobe Photoshop. Each day, we will have an "artistic photo challenge." Bring your digital camera - preferably one with manual mode that can capture raw image files.

Finding Your Next Furry Friend**Bueno****#8161****\$159.**

Students will learn about different breeds of animals to make good pet decisions and more! We will discover the costs of purchasing various animals, investigate animal habitats, discover behaviors for different types of animals, describe healthy animal attributes and learn cultural differences about animals around the world.

Drone Operator**Trapsi****#8162****\$169.**

Campers will engage in unmanned aerial vehicle (UAV) operation to develop critical cognitive skills through a hands-on, team approach. We will explore the engineering and science of drone technology and UAV systems, while also considering social and implications of drones. The program will include hands-on training in drone operation.

**2019 CAMPS MEET AT BLACK MOUNTAIN MIDDLE SCHOOL & MT CARMEL HIGH SCHOOL.
REGISTERED INDIVIDUALS WILL BE NOTIFIED OF CAMP CLASS LOCATIONS PRIOR TO CAMP.**

Grades 6-8, Week 4: July 15-19**Drone Operator****Trapsi****#8163****\$169.**

Campers will engage in unmanned aerial vehicle (UAV) operation to develop critical cognitive skills through a hands-on, team approach. We will explore the engineering and science of drone technology and UAV systems, while also considering social and implications of drones. The program will include hands-on training in drone operation.

Introduction to Engineering Design**Fischer****#8164****\$169.**

Turn your ideas into reality by making anything from jewelry to key chains. Using computer aided design to make 3D drawings, you will print your creations on a 3D printer starting with simple shapes and work up to more complex designs. Decorate your own creations with your signature style. Turn your ideas into reality using in STEAM!

Beginning Programming with Scratch & Spheros**Fisher, B.****#8165****\$169.**

Students will learn basic computer programming concepts using Scratch and Spheros. Scratch is a fun, visual computer language which allows students to create games, interactive stories and animations in a short amount of time. Spheros are spherical robots that you will program to do multiple tasks. Using both, students will be engaged to learn basic programming while having fun!

Fabulous Fabric Makeovers**Fowler****#8166****\$159.**

Come learn the basics of sewing, how to use a sewing machine and turn trash into treasure! We will explore ways to reuse items such as old jeans, t-shirts and plastic bags and turn them into storage bins, cell phone accessories, shabby chic bracelets and more. Plus you are encouraged to bring your own upcycling project to Friday's class to make and share your idea with other campers. Bring to the first class: a pair of jeans, t-shirt, optional buttons and trims salvaged from home or purchased from a thrift store. We'll supply everything else.

American Sign Language**Manning****#8167****\$149.**

Campers will have a week's worth of fun learning the basics of American Sign Language. They will also learn to sign popular songs that are sure to impress family and friends.

Introduction to Photography & Lightroom**Sheffler****#8168****\$169.**

Do you have an eye for photography? In this camp, you will explore all of the aspects of photography to capture the photos of your dreams! You will learn the principles of composition, exposure, the creative use of light in digital photography, and the basics of editing images using Adobe Photoshop. Each day, we will have an "artistic photo challenge." Bring your digital camera - preferably one with manual mode that can capture raw image files.

2D & 3D Art Exploration**Willkie****#8169****\$169.**

Come explore the 2D and 3D art worlds! Students will be introduced to the creative process where self-expression and experimentation are encouraged. Students will make abstract wire sculptures, learn about different artists, and be introduced to color theory.

Middle School Summertime Pop and Rock Ensemble**Holmes****#8170****\$159.**

For students with one or two years Middle school level band experience. You will spend the week keeping your skills sharp by playing some Rock, Pop and Blues favorites arranged for Middle School Concert Band. The week will end with a performance for parents and other guests. The instructor will request information from parents about students' instruments and prior band experience.

Learn and have fun at camp!
